

OLYMPIAD RULES

The Olympiad will last 3 astronomical hours. If a participant disappears from our monitors during the Olympiad, he should stop working and send his scanned (or photo) solutions to the organizing committee as soon as possible by email parviz06@list.ru or via messengers: Telegram, WhatsApp and IMO: (+992)918-51-75-70 . If this process takes more than 5 minutes, the work of this participant will not be taken into account.

Olympiad participants are strictly prohibited from using calculators and reference books.

If a participant needs to stand up, he must stop working and immediately send the solutions available at that time to the organizing committee.

Participants will be offered 6 tasks. The maximum general score is 50. Since the level of complexity of the tasks is different, the maximum score is distributed unevenly across the number of tasks.

If the formula or rules necessary to solve a problem are given, and the solution is completed from beginning to end with explanations, and the correct answer to the problem is found, then the maximum score will be given for this problem.

If a formula or rules necessary to solve a problem are given, and the solution is started but not completed, then a score will be given depending on what percentage of the problem is solved. For example, if 50% of a problem is considered solved, then 50% of the points allocated for this problem will be assigned accordingly.

If a formula or rules necessary to solve a problem are presented and an idea for a solution is presented, but the solution is not actually started, then 1 point will be awarded for that solution.

If the formula or rules necessary to solve a problem are given, but not a word is said about the solution, then no point will be given.

The number of honorable places, that is, first, second and third places, will be determined after checking the works. Depending on the results of the Olympiad participants, the jury can declare up to 30% of the participants as winners.

The absolute winner of the Olympiad will also be announced.

Each participant will receive a certificate signed by the rector of the Tajik National University.

Those who, by decision of the jury, receive first, second or third places are awarded a first degree diploma, second degree diploma and third degree diploma accordingly.

The absolute winner of the Olympiad will be awarded an Absolute Winner diploma.

The results of the Olympiad will be posted on the website of the Faculty of Mechanics and Mathematics on November 24, 2023, i.e. tomorrow, no later than 14:00 by Dushanbe time. If you do not agree with the result, you can contact the jury

at the above addresses until 16:00 November 24, 2023. The final result will be published on the above mentioned website at 17:00 on 11/24/2023.

The ceremony of announcing the winners and the official closing of the Olympiad will take place on November 25, 2023 at 10:00.

If you have any specific questions about the Olympiad, you can contact us at the above addresses, and the responsible persons will immediately answer your questions.

We wish all participants of the Olympiad good luck and success.
